### Perennial Plants

We grow perennial plants of all kinds. These are best transplanted in fall or early spring, while plants are dormant.

### Annual Plants

We grow annual plants of all kinds for bedding out in spring.

## Spring Blossoming Bulbs

Bulbs are most satisfactory, for when planted in common garden soil they yield flowers of rich and gorgeous colors with little care and cultivation.

Plant any time between September 1st and freezing time. Plant Tulips 4 inches deep and 4 to 6 inches apart.

Plant Narcissi 5 inches deep and 5 to 6 inches apart.

Bulbs should be lifted every second or third year, divided and reset, as they increase rapidly.

## Early Spring Tulips

Blossoming time for these tulips is during the month of April. They are particularly good for window boxes, as the shorter stems and brilliant colors make possible a good mass effect.

	Doz.	100
ARTUS, scarlet.....	\$ .60	\$4.20
BELLE ALLIANCE, scarlet.....	.60	4.20
